

Joseph Schenk

I lead teams, build processes and solve problems whilst delivering software solutions and managing strategic customer relationships. Skilled at scaling engineering operations and driving cross-functional collaboration across product, engineering and leadership teams.

I combine full-stack engineering experience with a strong coaching background to develop teams and software solutions that deliver consistent, measurable results.

Education:

Bachelor of Engineering | UWE
Bristol

Software Engineering

Immersive | General Assembly

Nationalities:

Switzerland, Great Britain

Languages:

English: Native

German: C1

French: A2

KEY SKILLS

Leadership:

- Strategic planning and roadmap execution
- Mentoring, coaching and team development
- Hiring and resource planning
- Performance frameworks, appraisals and operational process design
- Stakeholder management across leadership, product and customers

Technical and Engineering:

- Full-stack engineering (JavaScript, Node.js, Vue.js, React, Express, Python, Flask)
- Microservices and API design (REST, WebSockets)
- CI/CD and Observability (Kubernetes, Docker, Flux, Terraform, Grafana, DataDog)
- Databases (PostgreSQL, SQL)
- TDD (Jest, Cypress, Mocha, Chai)
- Version control (Git/Github)
- On-call operations and incident handling

Project and Delivery:

- Enterprise onboarding and delivery
- Solutions engineering and technical consulting
- Agile workflows and project management
- Cross-functional collaboration across product, engineering and customer success

EXPERIENCE

Head of Customer Solutions | January 2024 - March 2026

Livingdocs AG

Livingdocs offers an enterprise headless CMS platform servicing major media and publishing organisations in the DACH and Scandinavia regions

Leadership and Department growth:

- Scaled the Customer Solutions department from 3 to 10 engineers, improving delivery capacity whilst maintaining onboarding and operations across clients
- Introduced structured hiring criteria, interview process, onboarding frameworks and professional development processes
- Defined new role expectations, competency frameworks and appraisal processes to standardise performance development and improve employee satisfaction

Product and Delivery Strategy:

- Worked as part of the senior management team to align product strategy, resource planning and customer success priorities with company growth goals
- Designed and implemented standardised onboarding processes, improving predictability of project delivery and reducing cycle variation
- Introduced new project management and support tools to improve delivery overhead

Coaching and Team Development:

- Introduced new appraisal and performance review processes to better support team member growth
- Mentored engineers individually through structured feedback loops
- Established recurring team rituals to strengthen collaboration, engagement and cohesion

Solutions Engineer | December 2021 - January 2024

Livingdocs AG

Responsibilities:

- Owned customer software solutions end-to-end - from technical presales through delivery, deployments, ongoing improvements and operations
- Delivered full-stack software implementations in JavaScript, Node.js (Express) and Vue.js with PostgreSQL databases delivered using Kubernetes on Azure's AKS
- Designed and implemented features and product enhancements based on customer requirements, feasibility analyses and feedback cycles

Engineering Excellence:

- Implemented CI/CD pipelines with Kubernetes, Docker, Flux and Terraform on AKS
- Maintained code quality, ownership, debugging, observability and root-cause analysis through on-call rotations
- Practiced Test-Driven-Development to improve reliability and reduce deployment risk
- Contributed to release QA to ensure stability through regular deployments

Client and Stakeholder Management:

- Managed relationships with major publishers to ensure successful product adoption
- Worked cross-functionally with product, design and DevOps to ensure solutions were aligned with technology goals

Self Employed Routesetter, Coach and Photographer | 2013-2021

Key Facts:

- Professional climbing coach, technical advisor and routesetter across top climbing facilities in the UK and Europe
- Professional photographer in outdoor, commercial and wedding sectors
- Developed strong client management, consulting, coaching and business skills across multiple professional settings

Store Manager | 2016-2018

Banana Fingers

Responsibilities:

- Co-managed retail and warehouse operations, staff and customer experiences
 - Supported the owners through the successful sale of the business in 2018
 - Built practical experience in commercial management, logistics and team leadership
-
